

The global interest and the need for pure water – resulting in an effective electrochemical and bacterial protection of water installations – are in considerable growth. For more than 50 years Guldager A/S has been a leading supplier to this market as well as related markets.

In order to strategically insure and develop Guldager's position on these markets, Guldager A/S has enlarged the management board as of 1 January 2006 with two directors.

The management board at Guldager A/S now consists of Claus Bengtsson (Director of Sales), Helle Michaelsen (Technical Director), Henrik Guldager (working Chairman of the Board), and Hans Guldager (Managing Director).

The Guldager Group

Guldager is one of the oldest water treatment companies in Europe. The engineer Alfred Guldager invented the Guldager electrolytic protection system in 1923. Since then, more than 50.000 systems have been installed worldwide. Today the product programme includes much more than electrolysis systems for corrosion prevention. However, the basic field of activity is still to protect against corrosion and scale.

Business areas 2006

Corrosion Protection

Katolysis for domestic water piping systems

CatoCool[®], complete water treatment programme for cooling towers and industry

Cathodic protection of swimming pool filters, tanks etc.

Scale and lime stone protection

CalcFree, Carbon dioxide dosing for domestic water and industry

UniSoft and UniRo

Softening, de-carbonisation, and reverse osmosis for:

Hotels, restaurants and catering

Laundries and industry

Desalination of seawater

Membrane filtration of sewage

Protection against marine growth for offshore rigs
Antifouling with electrolysis, copper, and chlorine

Protection against Legionella
Risk assessment of the hot water installation
Service agreement on monitoring the bacteria prevention
Disinfection of boiler
Pipe flushing for bio slime
Yearly pipe flushing for bio slime

Companies:

Guldager Denmark Holding
Guldager Electrolyse International Holding, Switzerland;
Guldager A/S, Allerød, Denmark;
Guldager (Schweiz) AG, Füllinsdorf/Basel, Switzerland;
Guldager n.v., Vlezenbeek, Belgium
Guldager Sales Office, Berlin, Germany

Agents:

Aigner GmbH, Austria,
Yfantis Engineering, Corrosion Protection, Athens, Greece

Export to:

All European Countries, Middle-East, Asia

Quality control:

Certification according to ISO 9001 in course of preparation
